

Restaurants · Caterers · Shops

An assistant that answers your customers on WhatsApp, even in the evening. Nothing to install, I take care of everything.

Hours, menu, reservation or takeout order requests: you get a summary of every request.

How much you are losing (example)

Takeout orders lost per week (example: 12 unanswered evening messages, 1 in 4 wanted to order)

3

Average ticket (example)

\$27.50

Lost per week

\$82.50

Over 4 weeks

\$330

Example to adapt to your business: this is not a promise of earnings.

What it costs

Two plans, same service, same 60-day guarantee.
No commitment: \$649 one-time setup, then \$97.90 a month, VAT included. 12-month commitment: \$319 one-time setup, then \$97.90 a month, VAT included. 1,000 conversations a month included, 3 languages.

Under \$3.30 a day. One takeout order recovered a week, and it pays for itself.

60-day guarantee: not satisfied within 60 days, the setup fee is refunded, no conditions. Monthly fees start from go-live.

OPTION	WHAT IT COSTS	WHAT YOUR CUSTOMER HAS TO DO	WHAT'S MISSING
Zenchef (online booking)	From \$141.90 a month, one-year commitment	Book on a web form	No free-form questions or takeout sales; a real booking book, which the Assistant does not have
Uber Eats	\$330 commission on \$1,100 of delivered orders + \$2.19 a week	Go through the Uber Eats app	No table reservations; the customer belongs to Uber Eats
Tidio (AI chat + WhatsApp)	From \$56.67 a month, 50 AI conversations	Write on the website or WhatsApp	You set everything up yourself; English only
Assistant 24/7 (WhatsApp)	\$649 setup + \$97.90 a month (under \$3.30 a day), no commission	Nothing: the WhatsApp they already have	Collects the request, you confirm; no calendar by default, no payment

It's too expensive.

Look at the table: under \$3.30 a day, and one takeout order recovered a week pays for the month. Not satisfied within 60 days: the setup fee is refunded.

What if it says something silly?

It follows a path of prepared questions, summarizes the request and has the customer confirm it before passing it on. The reservation itself is confirmed by the owner.

Not all my customers use WhatsApp.

Those who do write with no account and no app to install. Phone, counter and website stay as they are.

I already use Zenchef or TheFork.

Zenchef keeps a real reservation book (from \$141.90 a month). The Assistant answers on WhatsApp at any hour, in 3 languages, and also takes takeout orders, with no commission. The two complement each other.

How it starts

1. You scan the code and see the offer.

2. A 15-minute meeting to decide.

3. Setup is done for you: nothing to install on your side.

What you get

• WhatsApp answers 7 days a week, in 3 languages

• Guided path of prepared questions: hours, menu, reservation, takeout order

• Request summarized and confirmed by the customer before it is passed on

Scan with your phone camera
